Example of a Philosophical Essay: Who Am I?

I. Introduction Sample

Although I am an insignificant player in the theatre of life, I hope to become an influential person one day. Basically, the question “Who Am I” underscores the fact that human nature is complicated, and it takes an entire lifetime for individuals to understand themselves fully. In particular, the essence of this question is that, despite sharing humanity’s title, people from all walks of life express themselves in diverse ways.

II. Example of a Body

On the question “Who Am I,” I can confidently say that I am an individual in the process of “becoming.” For example, when it comes to talking about human beings and the world, the discourse that attracts a significant audience is a discussion about men and women who have made a mark in the world. Moreover, these aspects include war heroes, successful businesspersons, influential political leaders, and controversial personalities. In this case, my contribution to the world stage can only be defined as insignificant. Nonetheless, I do not allow this reality to define my self-concept. I believe that “human life is a journey of a thousand miles,” and even those that we celebrate today are once insignificant personalities. Besides, I believe that a secret is to remain focused on what one desires to be in the coming future. In turn, I have a habit of volunteering in healthcare settings because I would love to become a nurse after college.

III. Conclusion Sample

Life is like a river that can carry an individual to familiar or strange destinations. In my case, I am hopeful that it will relocate me from a place of insignificance to a place of

significance. For this reason, I always remain cheerful, optimistic, and hopeful, and, in one day, I will be influential like those we celebrate today.
